ftech. So we havent got any problems with that. Had the problem with other vendor before. I will buy from there again, if I will need again. Finally thanks for your support and if something is not working or broke the product than the price is 0,00. Thank you. ? tamiam 09/11/2019 , London, United Kingdom 5 "Glowforge Foundation bundle, 15% off" Found this on Amazon. Not sure which bundle is the one i want but am happy to add it to my basket. I can not for the life of me find the bundle on Glowforge site. ??σ? Fay 09/10/2019 4 "Great deal!" Being a beginner and having had negative experiences with other hardware 3D printers, I was apprehensive when I purchased the Glowforge Mini. However, I'm glad I did! The instructions are clear and well written, and the build time and range of parts are excellent. The base material is very sturdy, and the build bed is extremely comfortable. The downside: the build plate needs to be in the correct orientation for successful use. However, the Glowforge help section on YouTube does a great job of explaining how to get the build plate working in a variety of orientations. There are also video tutorials available on the Glowforge Youtube page. I've also had some software issues, but they have been dealt with swiftly by the company. I had to contact them directly to receive help and a refund for my purchase (you do have to agree to use them as a company representative as a condition of receiving support, and they won't actually refund your money unless they approve it). I would recommend that you contact them directly if you experience any software problems. They will happily set up a refund so that you can continue to use the product. Overall, a great product at a reasonable price, and with excellent customer service. I'm very happy with my purchase and can recommend it without reservation. alex Devon, United Kingdom "Very impressed!" I just got my Glowforge in the post today. It is fantastic! This will be my first 3D printer, I was underwhelmed 82157476af
